SUMMARY

Software Engineer with 3 years of experience in full-stack development and a strong background in Java, Python, and JavaScript. Proven track record of delivering high-quality code and solutions for complex software projects. Experienced in Agile methodologies and collaborative problem-solving. Seeking challenging opportunities to leverage expertise in software development and contribute to the success of a dynamic organization.

EXPERIENCE

Web Development

Freelancer   **January 2022 – present**

· As a freelance fullstack web developer since January 2022, I've crafted custom web applications, collaborating closely with clients to deliver seamless user experiences. Proficient in frontend (HTML5, CSS3, React, Vue) and backend (Laravel, Django, Node.js,), I've consistently exceeded client expectations through creativity, reliability, and attention to detail.

PROJECTS

Aushaih Recruitment Office

aushaih.com · June 2024

· Developed Aushaih.com, the official platform for Aushaih Recruitment Office using laravel.
· The website allows clients to easily chose and recruit workers to meet their recruitment needs.

Attendance Management System With Face Recognition using Raspberry Pi

June 2022

· Developed using Django framework for a secure and scalable web application.
· Designed an intuitive and user-friendly interface using bootstrap for administrators, students and Teachers.
· Implemented face recognition using Raspberry Pi to help in the attendance tracking.

Shahid4U

June 2023

· Shahid4U website, a dedicated platform for online movie streaming.
· Full-Stack Development: Implemented both frontend and backend components.
· Database Management: Developed a robust backend infrastructure, managing databases efficiently to catalog and retrieve movie information seamlessly.
· Web Scraping: Extract detailed movie information from IMDb.
